

Pump technology

The proven Reldair pump system can be executed on request with an integrated storage tank, a frequency controlled pump motor, UV disinfection, pH—control or prefiltration.

The pump system supplies, depending on the chosen fog system, a controlled pressure of 100 or 120 bar.

The system is supplied with CE marking, ex works free of legionella and engineered for your specific mode of operation.

Pressure regulator

Overpressure control

Opaque filter housing
to avoid algae

Optimized control on
humidity by engineered
'fit for use'

Sturdy, low maintenance, high
quality triplex plunger pump
